

Squalane combination fiber

Papolis

"Squalane for Your Body" with the Wish for Beautiful Skin

Night gloves

Socks

Innerwear

Face mask

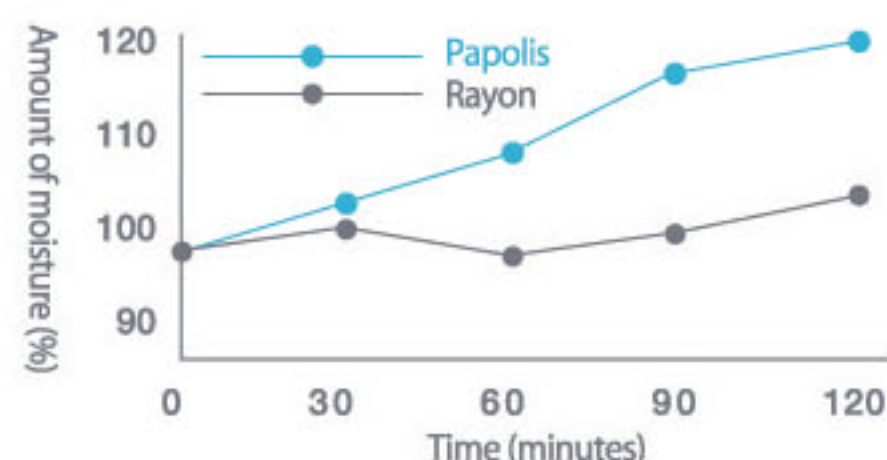

EMOLLIENT Because Squalene is Blended in

Supply softness to your skin's stratum corneum.

When your skin's stratum corneum dries, it can cause skin problems. The emollient effect of Papolis restores softness when worn by those whose skin tends to dry.

Squalane effect increases the amount of ceratoid moisture!

◆ Difference in the amount of ceratoid moisture after wearing the product

SMOOTHLY Because Squalene is Blended in

A smoother, softer touch.

The surface of Papolis is smoother since squalane has been directly kneaded into the fiber itself, giving it a softer touch. From the moment you first touch it, you can actually feel its "tenderness".

Use Papolis and it becomes smooth!

◆ Degree of smoothness shown in friction factors

	Friction Factor
Mixture of Papolis and rayon	0.482
100% rayon	0.530

LONG KEEP Because Squalene is Blended in

Wash durable with long lasting effect.

Because squalane is kneaded into the fiber rather than being coated on the surface, textile function does not decrease through washing, but maintains its moisturizing effect.

At least 85% of the squalane in Papolis remained even after 50 washings!

◆ Conservation of effect seen in home laundry test

	New Product	After 30 washes	After 50 washes
Amount of squalane content	100%	90.5%	85.9%

ABOUT SQUALANE

A natural component contained a lot in sebum. In overseas countries, squalane has been an appreciated medicine for many generations. For Papolis, we use squalane taken from deep sea sharks that have a high prevalence of squalene, treat it to prevent oxidization and alteration, then refines it to a purity of 99% or higher.
